10	Team, Tools & Budget Requirements	13
11	Build Roadmap & Timeline	14
12	Success Metrics & KPIs	15

01 · Vision, Positioning & Competitive Strategy

THE AMBITION

Ayava Creatives will not be positioned as "another digital marketing agency." The website itself is the flagship product — a digital flagship store that must feel more premium, more immersive, and more technically superior than any agency site currently live, anywhere in the world. The benchmark set is deliberately above the category: not Neil Patel Digital or WebFX, but the visual and interaction quality of Apple, Rolex, Pentagram, Ferrari, and Awwwards Site-of-the-Year winners — applied to a marketing-agency conversion funnel.

Who We Are Beating

Benchmark	Their Strength	Where Ayava Must Win
WebFX (USA)	SEO authority, huge content library	Design sophistication, brand storytelling, speed
Ogilvy / WPP networks	Enterprise credibility, global scale	Digital-native UX, personalization, interactivity
Social Beat / WATConsult (India)	Local market trust, case studies	Global-grade visual design, luxury feel, motion design
Neil Patel Digital	Personal brand, thought leadership	Immersive experience, enterprise service depth
Boutique Awwwards agencies	Cutting-edge visual/motion design	Business depth — services, proof, scalable content

Strategic Pillars

1 Luxury-Grade Visual Identity

Every pixel should read "premium." Generous whitespace, cinematic imagery, restrained gold/black/ivory palette, editorial typography — the aesthetic of a fashion house, not a template.

2 Enterprise Depth of Service

The site must document every service (SMM, Meta Ads, Google Ads, SEO, Web Design, Branding, Content, Influencer, Email/CRM, App Marketing, PR) with the depth and proof normally reserved for Fortune-500 consultancies.

3 Technical Superiority

Sub-1.5s load times, flawless Core Web Vitals, buttery scroll-triggered animation, full accessibility (WCAG 2.2 AA), and multi-region performance — engineered like a SaaS product, not a marketing brochure.

4 Global-First, India-Rooted

Multi-currency, multi-region case studies, and localized proof points so the site simultaneously wins trust in Mumbai boardrooms and New York procurement teams.

5 Proof-Obsessed Conversion Engine

Every page pairs beauty with evidence — real metrics, client logos, awards, certifications, live dashboards — so premium design never feels hollow.

02 · Brand & Design System (Luxury Aesthetic Language)

Visual Direction

Element	Direction
Core Palette	Deep obsidian black (#0B0A08), warm ivory/cream (#F8F1E2), signature gold accent (#CBA135), muted bronze (#6B5A2E) — used sparingly as an accent, never flooding the page
Secondary Palette	Soft graphite grey, off-white section backgrounds, one deep jewel tone (emerald or sapphire) reserved for data-viz / dashboard modules
Typography	Editorial serif display face (e.g. custom variant of Canela / GT Sectra / Freight Display) for headlines; clean grotesque sans (e.g. Neue Montreal / Suisse Int'l) for body & UI
Imagery	Cinematic original photography and 3D renders — no generic stock. Studio-shot team/office imagery, custom motion-graphics for service explainers
Iconography	Custom single-weight line icon set, gold on hover, consistent 2px stroke
Motion Language	Slow, confident easing curves (cubic-bezier 0.16,1,0.3,1). Scroll-linked reveals, parallax depth layers, magnetic buttons, cursor-aware micro-interactions — used purposefully, never gimmicky
Grain & Texture	Subtle film-grain overlay + soft gradient lighting effects on dark sections for a premium, tactile, non-flat feel
Layout Grid	12-column asymmetric editorial grid; generous negative space (40–50% of viewport on hero sections); oversized type-led moments between sections

Brand Voice

Confident, precise, outcome-obsessed — closer to a Swiss watchmaker's brochure than a typical "we grow your business!!" agency tone. Every headline states a result, not a promise. Numbers, not adjectives, do the persuading.

Design System Deliverables

- Full Figma design system: color tokens, type scale, spacing scale, component library (buttons, cards, forms, nav, modals, data-viz)
- Motion specification document (easing, durations, scroll-trigger rules)
- Responsive breakpoints: 1920 / 1440 / 1024 / 768 / 428 / 375
- Dark-mode-first design, with refined light-mode variant for content-heavy pages
- Accessible color-contrast validated palette (WCAG AA minimum on all text)

03 · Complete Site Architecture & Sitemap

Primary Navigation

- 1. **Home**
- 2. **Services** (mega-menu hub)
 - Social Media Marketing (SMM)
 - Meta Ads (Facebook & Instagram)
 - Google Ads & PPC
 - Search Engine Optimization (SEO)
 - Website Design & Development
 - Branding & Creative Identity
 - Content Marketing & Copywriting
 - Influencer Marketing
 - Email & CRM Marketing (Marketing Automation)
 - App Store Marketing (ASO)
 - Video & Motion Production
 - Public Relations & Reputation Management
 - E-commerce Growth (Shopify/D2C)
 - Analytics & Conversion Rate Optimization
 - AI Marketing & Automation Solutions
- 3. **Industries** (Real Estate, D2C/E-commerce, Healthcare, Hospitality & Travel, FinTech, Fashion & Luxury, EdTech, SaaS/Tech, Automotive, F&B/QSR)
- 4. **Work** (Portfolio & Case Studies)
- 5. **Results** (Live metrics / proof hub)
- 6. **About** (Agency, Team, Culture, Process)
- 7. **Insights** (Blog / Resources / Reports)
- 8. **Pricing & Packages**
- 9. **Careers**
- 10. **Contact / Start a Project**
- 11. Client Portal (secure login — footer/utility nav)

Full Page Inventory

#	Page	Purpose
1	Homepage	Flagship brand experience + funnel entry
2	Services Hub	Overview grid of all 15 services

3–17	Individual Service Pages (×15)	Deep-dive per service: process, deliverables, pricing tiers, proof
18	Industries Hub	Overview of verticals served
19–28	Individual Industry Pages (×10)	Vertical-specific case studies & strategy
29	Work / Portfolio Hub	Filterable case study gallery
30+	Individual Case Study Pages	Deep narrative + data per client (expandable library)
31	Results / Proof Dashboard	Aggregated live-style metrics, awards, certifications
32	About — Agency Story	Mission, founding story, values, timeline
33	About — Team	Leadership + department team grid
34	About — Process	The Ayava Method (step-by-step engagement model)
35	Insights / Blog Hub	SEO content engine, category filters
36	Individual Article Pages	Long-form authority content
37	Resources / Free Tools Hub	Downloadable reports, calculators, templates
38	Pricing & Packages	Transparent tiered packages + custom enterprise quote
39	Careers Hub	Culture, open roles, benefits
40	Individual Job Listing Pages	Role detail + application
41	Contact / Start a Project	Primary conversion page, smart intake form
42	Book a Strategy Call	Calendar-integrated booking flow
43	Client Portal (Login)	Secure dashboard access
44	Client Portal (Dashboard)	Campaign performance, reports, invoices
45	Awards & Recognition	Press mentions, award wall
46	Sustainability / CSR (optional)	Brand depth & enterprise credibility
47	Legal — Privacy Policy	Compliance (GDPR/DPDP/CCPA)
48	Legal — Terms of Service	Compliance
49	Legal — Cookie Policy	Compliance
50	404 / Error Page	On-brand, playful recovery page

Total: 50+ structured page templates, several with dozens of dynamically generated instances (case studies, articles, jobs) — giving the site the scale and content depth of an enterprise publication, not a five-page brochure site.

04 · Page-by-Page Section & Feature Blueprint

Homepage — Section-by-Section

1. **Cinematic Hero** — full-viewport looping motion background (brand film / 3D abstract), oversized kinetic headline, scroll-cue, live rotating stat ticker (">\$212M+ client revenue generated", "480+ campaigns live", "38 countries served")
2. **Trust Bar** — auto-scrolling logo marquee of client brands, grayscale-to-color on hover
3. **Services Showcase** — interactive horizontal-scroll or hover-expand grid of all 15 services with icon, one-line outcome, link
4. **Results Strip** — animated counters (revenue generated, ROAS average, leads delivered, retention rate) with subtle count-up-on-scroll
5. **Featured Case Studies** — 3 flagship stories, large imagery, before/after metric callouts, "View full story" reveal
6. **The Ayava Method** — 4–5 step process visual (Discover → Strategize → Build → Launch → Scale) with scroll-linked animation
7. **Industries We Dominate** — vertical tiles with hover video preview
8. **Why Ayava (Differentiators)** — comparison-style module vs "typical agencies"
9. **Testimonial Theater** — full-bleed video testimonials carousel with client photo, name, title, company logo
10. **Awards & Press Wall** — logos of publications/awards
11. **Insights Preview** — 3 latest articles/reports
12. **Global Presence Map** — interactive world/India map showing office locations & markets served
13. **CTA Band** — "Start a Project" with dual path (Book a Call / Get a Proposal)
14. **Footer** — mega-footer: sitemap, newsletter signup, social links, certifications (Google Partner, Meta Business Partner), office addresses, awards badges

Service Page Template (×15 pages)

- Hero: outcome-led headline + relevant animated visual
- "The Problem We Solve" narrative block
- Our Approach — numbered methodology specific to that service
- Deliverables checklist (what's included)
- Tools & platforms used (logos: Meta, Google, SEMrush, HubSpot, etc.)
- Relevant case study spotlight with metrics
- Pricing tiers relevant to this service
- FAQ accordion (schema-marked for SEO rich snippets)
- Related services cross-links
- Related industry cross-links
- Embedded lead-capture mini-form / calculator (e.g. "Estimate your ad budget ROI")
- Sticky CTA sidebar on scroll

Case Study Page Template

- Full-bleed hero image/video of the client's brand work
- Snapshot bar: Industry, Services Used, Duration, Region
- The Challenge → The Strategy → The Execution → The Results (narrative flow with in-line data visualizations)
- Before/after metric comparison (animated bar/line charts)
- Client quote block with headshot
- Visual gallery of creative assets produced
- Next case study preview (infinite scroll pattern)

About / Team / Process Pages

- Founder's letter / manifesto — cinematic typographic scroll section
- Company timeline (milestones, founding to present) with scroll-driven animation
- Core values grid with icon-led cards
- Leadership team grid — photo, name, role, LinkedIn, short bio on hover-flip
- Department showcase (Strategy, Creative, Performance, Tech, Client Success)
- Office/culture photo gallery
- "The Ayava Method" detailed process page with interactive step navigator

Insights (Blog) & Resources

- Category + tag filtering, search-as-you-type
- Featured/pinned article hero
- Reading-time, author bio, related-article recommendations
- Downloadable gated resources (industry reports, whitepapers) behind email-capture
- Free interactive tools: ROI Calculator, Ad Budget Planner, SEO Audit Tool (auto-scan of a submitted URL), Social Media Grader
- Newsletter subscription with preference center

Pricing & Packages

- Toggle: Startup / Growth / Enterprise tiers, and Monthly/Quarterly/Annual billing toggle
- Transparent feature-comparison matrix
- "Build Your Own Package" interactive service-bundler with live estimated quote
- Enterprise custom-quote intake path with dedicated concierge messaging

Contact / Start a Project

- Multi-step smart intake form (business info → goals → budget range → services needed → files/brief upload)

- Progress indicator, auto-save, conditional logic (form adapts based on answers)
- Alternative paths: Book a Call (calendar embed), WhatsApp Business chat, direct email, office visit booking
- Global office directory with interactive map, timezone-aware "we're online now" indicator
- Response-time guarantee messaging ("We reply within 4 business hours")

Client Portal

- Secure login (SSO-ready), role-based access
- Live campaign performance dashboard (pulled via API from Meta/Google Ads/GA4)
- Monthly report archive (auto-generated branded PDF reports)
- Invoice & contract center
- Direct messaging thread with account team
- Asset/deliverables library (creatives, documents)

05 · Signature Enterprise Features

These are the features that will make Ayava's site feel categorically larger and more advanced than any competitor's.

Experience & Design Features

- Custom cursor with magnetic hover states on interactive elements
- Scroll-driven cinematic storytelling sections (GSAP ScrollTrigger-grade animation)
- Page-transition system — smooth cross-fade/curtain transitions between routes (no jarring reloads)
- Ambient sound toggle for brand film moments (opt-in, muted by default)
- Dark/Light mode toggle with persisted preference
- 3D/WebGL hero elements on homepage and select service pages (Three.js/WebGL abstract visuals)
- Command palette (⌘K style quick-navigation search across the whole site)
- Accessibility mode toggle (larger text, reduced motion, high contrast)

Interactive Marketing Tools

- **ROI / Ad Spend Calculator** — input industry + budget → projected returns
- **Free Instant SEO/Website Audit Tool** — user submits URL, receives real-time scored report + lead capture
- **Social Media Grader** — connects/analyzes a public handle, scores performance
- **Package Builder / Quote Configurator** — drag-select services, live price estimate
- **Interactive Case Study Data Visualizations** — animated charts users can filter by metric/time range
- **Global Results Map** — clickable map showing campaign performance by country/region

Trust & Proof Systems

- Verified reviews integration (Google, Clutch, GoodFirms badges pulled live)
- Real-time "Live Activity" ticker (e.g. "Proposal sent to a FinTech client in Dubai — 3 mins ago") — anonymized, builds momentum perception
- Certification wall (Google Partner, Meta Business Partner, HubSpot Partner)
- Security & compliance badges (ISO, GDPR/DPDP compliant) in footer

Conversion & Personalization

- Smart content personalization by visitor source/industry (e.g. visitor from a real-estate referral sees real-estate case studies surfaced first)
- Exit-intent capture with high-value resource offer
- Progressive profiling in forms (returning visitors see shorter forms)
- AI chat concierge — trained on Ayava's services, qualifies leads 24/7, escalates to human
- Multi-language support (English, Hindi, Arabic, Spanish for global reach) with auto-locale detection

- Multi-currency pricing display (INR, USD, GBP, AED)

Content & Authority Engine

- Annual "State of Digital Marketing" flagship report (interactive microsite-style page, major PR/backlink asset)
- Podcast/video interview series hub
- Press & media kit downloadable page

06 · Technology Stack & Architecture

Layer	Recommendation	Why
Framework	Next.js 15 (React) with App Router	SSR/ISR for SEO, best-in-class performance, huge ecosystem
Styling	Tailwind CSS + custom design tokens	Fast, consistent, scalable design system implementation
Animation	GSAP + Framer Motion + Lenis (smooth scroll)	Industry standard for premium scroll storytelling
3D/WebGL	Three.js / React Three Fiber	Hero visuals, brand differentiation
CMS	Headless — Sanity.io or Contentful	Marketing team can publish case studies/blog without dev help
Hosting/Infra	Vercel (Edge Network) or AWS + Cloudflare CDN	Global edge delivery, sub-second TTFB worldwide
Forms/Automation	Custom API + HubSpot/Zoho CRM integration	Lead routing, nurture sequences, sales visibility
Client Portal Backend	Node.js/Next API routes + PostgreSQL + Meta/Google Ads APIs	Live campaign data pull for dashboards
Auth	NextAuth / Clerk with role-based access	Secure client portal login, SSO-ready
Search	Algolia	Instant site-wide & blog search, command palette
Analytics	GA4 + Mixpanel + Hotjar/Clarity + server-side tagging	Full funnel visibility, privacy-resilient tracking
Testing/QA	Playwright (E2E) + Lighthouse CI	Guarantees performance/accessibility never regress
Security	Cloudflare WAF, SSL, regular pen-testing, GDPR/DPDP compliance layer	Enterprise-grade trust

Performance Targets

- Lighthouse Performance score: 95+ on all core templates
- LCP under 1.8s, CLS under 0.1, INP under 200ms (Core Web Vitals "Good" on every page)
- Image delivery via next-gen formats (AVIF/WebP) with automatic responsive srcsets
- Global CDN edge caching — under 100ms TTFB in India, US, EU, and MENA

07 · SEO, Performance & Global Scalability

SEO Architecture

- Full technical SEO foundation: clean URL structure, XML sitemap, robots.txt, canonical tags, structured data (Organization, Service, Article, FAQ, Review schema) on every relevant template
- Programmatic SEO layer for service × industry × location combinations (e.g. "Google Ads Management for Real Estate in Mumbai") generated from a structured content model — scalable to hundreds of high-intent landing pages
- Topic-cluster content architecture: pillar pages (e.g. "Complete Guide to Meta Ads") linking to supporting articles
- International SEO: hreflang tags for multi-region/language targeting
- Core Web Vitals as a hard release gate — no page ships below "Good" thresholds

Scalability for Global Growth

- Multi-region CDN + edge functions for localized content delivery
- Component-driven design system so new pages/campaign landing pages can be assembled rapidly without custom dev
- Headless CMS structure supports future expansion into new service lines, industries, or regional microsites without re-architecture
- API-first backend so the client dashboard, mobile app (future), and marketing site all share one data layer

08 · Content, Copywriting & Trust Strategy

- Every headline is metric-led, not adjective-led ("We grew a D2C brand's revenue 340% in 11 months" beats "We deliver amazing results")
- Consistent proof pairing rule: every claim on the site sits within one scroll of a supporting number, logo, or testimonial
- Original photography/videography of the actual team and office — no stock photos on trust-critical pages (About, Team, Testimonials)
- Case studies written in narrative arc format (Challenge → Strategy → Execution → Result) rather than bullet lists, for higher engagement and shareability
- Tone guide + editorial style guide delivered alongside design system for consistent voice across all future content

09 · Conversion & Growth Systems

- Dual-path CTA strategy throughout: low-commitment ("Get Free Audit") + high-commitment ("Book Strategy Call") side-by-side
- Lead scoring integrated with CRM — form answers auto-tag lead quality/priority for sales follow-up speed
- A/B testing framework built into hero sections and CTAs from day one (e.g. via Vercel Edge Config / Optimizely)
- Post-launch conversion rate optimization cadence: monthly heatmap + funnel review, quarterly redesign sprints on underperforming templates
- Referral/partner program landing page for agency-to-agency or affiliate growth

10 · Team, Tools & Budget Requirements

Recommended Build Team

Role	Responsibility
Creative/Brand Director	Owns overall aesthetic vision, art direction
UI/UX Designer (Figma)	Full design system + every page/state design
Motion/Interaction Designer	Animation choreography, micro-interactions
3D/WebGL Artist (contract)	Hero 3D visuals, brand film assets
Frontend Engineers (×2–3)	Next.js build, animation implementation, performance tuning
Backend Engineer	CMS integration, client portal, API integrations
SEO Strategist	Technical SEO, content architecture, programmatic SEO
Copywriter/Content Strategist	All on-site copy, case studies, blog
Photographer/Videographer	Original brand imagery & film
QA/Test Engineer	Cross-browser, accessibility, performance QA
Project Manager	Timeline, stakeholder alignment, launch coordination

Estimated Budget Bands (Indicative)

Scope Tier	Range (USD)	What You Get
Foundation Build	\$18,000 – \$30,000	Full design system + core 15–20 pages, no custom 3D/portal
Enterprise Flagship (Recommended)	\$45,000 – \$80,000	Full 50-page architecture, custom motion/3D, client portal, programmatic SEO
Category-Defining	\$90,000+	Above + custom WebGL brand film, multi-language, AI concierge, annual flagship report microsite

Figures are indicative planning bands for scoping conversations with agencies/freelancers — actual quotes will vary by talent location and vendor.

11 · Build Roadmap & Timeline

Phase	Duration	Key Deliverables
Phase 0 — Discovery & Strategy	Weeks 1–2	Brand audit, competitor teardown, sitemap lock, content inventory, brief sign-off
Phase 1 — Brand & Design System	Weeks 3–6	Visual identity refinement, Figma design system, key page designs (Home, Service, Case Study templates)
Phase 2 — Full UI Design	Weeks 7–10	All 50 page templates designed, motion prototypes, responsive states
Phase 3 — Content Production	Weeks 6–12 (parallel)	Copywriting, case study data collection, photography/videography shoot, 3D asset production
Phase 4 — Frontend Development	Weeks 9–16	Component library build, page assembly, animation implementation, CMS wiring
Phase 5 — Backend & Integrations	Weeks 12–17	Client portal, CRM/API integrations, forms, calculators, chat concierge
Phase 6 — SEO & Content Load	Weeks 14–18	Technical SEO implementation, programmatic pages, initial blog/case-study library populated
Phase 7 — QA, Performance & Accessibility	Weeks 17–19	Cross-browser/device QA, Lighthouse/Core Web Vitals tuning, WCAG audit, security review
Phase 8 — Soft Launch	Week 20	Staged rollout, internal review, analytics validation
Phase 9 — Public Launch & PR Push	Week 21	Full launch, press outreach, flagship report release for backlinks/buzz
Phase 10 — Post-Launch Optimization	Ongoing	Monthly CRO cycles, quarterly content/design refreshes, continuous SEO scaling

Total realistic timeline to a full enterprise-grade launch: approximately 20–22 weeks (~5 months) for the complete build; a focused MVP (Home + core service pages + contact + 5 case studies) can launch in 6–8 weeks and expand from there.

12 · Success Metrics & KPIs

Category	Metric	Target (First 6 Months Post-Launch)
Performance	Lighthouse Score / Core Web Vitals	95+ score, 100% pages "Good" CWV
Traffic	Organic sessions	3–5x baseline within 6 months via programmatic SEO + content engine
Engagement	Avg. session duration, scroll depth	+50% vs. industry average agency site (~40–60s)
Conversion	Visitor-to-lead rate	3–5% (enterprise B2B benchmark: 2–3%, target above-market)
Lead Quality	MQL-to-SQL conversion via CRM scoring	≥35%
Brand	Direct/branded search volume growth	+100% YoY as flagship content/PR compounds
Recognition	Design awards submitted (Awwwards, CSS Design Awards, FWA)	Site of the Day / Honorable Mention within first year

Ayava Creatives — Master Website Blueprint · Prepared August 2026 · This document is the strategic foundation. Next step: lock the sitemap and commission the Figma design system.
